Election/Restrictions

The previous restriction requirement has been withdrawn with respect to this updated requirement. With respect to the applicants arguments that the species are different orientations the species requirement has been revised, but since the different figures clearly show distinct embodiments it is still deemed proper.

This application contains claims directed to the following patentably distinct species of the claimed invention: an implantable endoluminal graft.

Species 1 shown in figure 4

Species 2 shown in figure 6

Species 3 shown in figure 7

Species 4 shown in figure 8

Species 5 shown in figure 15

Species 6 shown in figure 16

Species 7 shown in figure 17

Species 8 shown in figure 18

Species 9 shown in figure 19

Species 10 shown in figure 20

Species 11 shown in figure 21

Species 12 shown in figure 22

Species 13 shown in figure 23

Species 14 shown in figure 24

Species 15 shown in figure 25

Page 3

Application/Control Number: 10/672,695

Art Unit: 3738

Species 16 shown in figure 26

Upon election from the above species a further election from the following subspecies is required.

Species 17 shown in figure 3

Species 18 shown in figure 5

Species 19 shown in figure 27

Species 20 shown in figure 28a

Species 21 shown in figure 28b

Species 22 shown in figure 29

Species 23 shown in figure 30

Species 24 shown in figure 31

Species 25 shown in figure 32

Species 26 shown in figure 33

Species 27 shown in figure 34

Species 28 shown in figure 35

Species 29 shown in figure 36

Species 30 shown in figure 37

Species 31 shown in figure 38

Species 32 shown in figure 39

Species 33 shown in figure 40

Species 34 shown in figure 41

Art Unit: 3738

Upon election from the above species a further election from the following subspecies is required.

Species 35 wherein the microporous metal thin film covering maintains a martensite crystalline structure throughout a temperature transition from room temperature to body temperature and behaves martensitically in vivo.

Species 36 wherein the microporous metal thin film covering maintains a martensite crystalline structure throughout a temperature transition from room temperature to body temperature and behaves martensitically in vivo.

Species 37 wherein the microporous metal thin film covering that undergoes a phase transition, from martensite to austenite crystal structure, during a temperature transition from room temperature to body temperature and behaves austenitically in vivo.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are considered generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that

Art Unit: 3738

a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

A telephone call was made to David Rosenbaum on 11/16/05 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim

Art Unit: 3738

remaining in the application. Any amendment of inventorship must be accompanied by

a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Christopher D Prone whose telephone number is (571)

272-6085. The examiner can normally be reached on Monday Through Fri 8:30 to 5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Corrine McDermott can be reached on (571) 272-4754. The fax phone

number for the organization where this application or proceeding is assigned is 703-

872-9306.

Information regarding the status of an application may be obtained from the

Patent Application Information Retrieval (PAIR) system. Status information for

published applications may be obtained from either Private PAIR or Public PAIR.

Status information for unpublished applications is available through Private PAIR only.

For more information about the PAIR system, see http://pair-direct.uspto.gov. Should

you have questions on access to the Private PAIR system, contact the Electronic

Business Center (EBC) at 866-217-9197 (toll-free).
